DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fukasawa.

As regards claim 1, Fukasawa (Figs. 1-15) teaches an imaging lens system comprising, in the named order from the side of an object toward an image surface, a stop (SP), a first lens (1) having a positive power with a main power on the side closer to the image surface, a meniscus-shaped second lens (2) having a negative power with a strong concave surface turned toward the image surface.

In the above rejection, the stop (SP) is equivalent to the light amount diaphragm of the present claim 1 because **the stop** is a disk having a **fixed opening** used to restrict the amount of light; and this characteristic would fit the definition of diaphragm as defined in The American Heritage Dictionary (Second College Edition). The diaphragm is defined as "A disk having a **fixed** or variable opening used to restrict the amount of light traversing a lens or optical system".

Allowable Subject Matter

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The allowable subject matter of claims 2-5 is based on the condition expressions recited principally in claims 2 and 3.
